Company Profile & Track Record

Evidence-Led Structural Engineering

Gurukripa Constructions is a premier Bengaluru-based structural design and turnkey construction firm led by Er. Anuj Jain (B.E. Civil, M.Tech Structural). Established in 2019, we take a quiet, evidence-led approach to structural design. Every structural member is sized to a rigorous load case modeled in ETABS, and SAFE, and put on site.

Over 7+ years of engineering excellence, we have delivered over 10+ major turnkey construction projects comprising of 92,000+ square feet across Bengaluru, 30+ renovation & retrofitting projects, 30+ architectural & structural design projects.

Founder's Guarantee

"Buildings are built to endure for generations. Our responsibility as structural engineers and builders is to ensure every foundation, beam, and slab is executed with complete technical clarity, zero guesswork, and absolute structural integrity."

— **Er. Anuj Jain** (B.E. Civil, M.Tech Structural)

Our Core Operating Pillars

1. Comprehensive Structural Design

Every structural calculation is personally verified prior to site execution.

2. Transparent BOQ Pricing

Detailed line-item quantities priced at market rates with zero soft numbers.

3. Weekly Progress Reports

Friday site reports with variance tracking delivered directly to client boards.

4. Certified QA/QC Lab Checks

Cube strength and independent steel ultrasonic testing at every concrete pour.

Construction Services

DIVISION 01

End-to-end turnkey building and structural engineering construction are taken up across Bengaluru. Guided by Founder Anuj Jain (B.E. Civil, M.Tech Structural), every villa, apartment building, commercial tower, and RCC frame is built with ETABS load modelling and zero-compromise engineering.

Residential Construction

Villas, row houses, custom homes, apartment buildings

Homes are the work we are most known for. We build for owners who plan to live in the house for decades. That means honest materials, generous tolerances, and a finishes schedule signed off before the slab is poured.

- Independent villas (G+1 to G+3)
- Row-house and small-cluster developments
- Apartment and duplex buildings
- Vaastu-aligned planning

Commercial Building Construction

Offices, retail, mixed-use towers

Commercial projects live and die by their schedule. We plan critical-path activity at the modelling stage, not on site, and we share weekly cost-and-schedule reports our clients can take straight to a board meeting.

- Warehouse buildings
- Retail and showroom fit-outs
- Mixed-use towers up to G+7
- Institutional buildings

Renovation & Structural Retrofitting

DIVISION 02

Diagnosing and strengthening existing buildings with structural wrapping, steel jacketing, load-bearing wall removals, and floor extensions. We extend building lifecycles by 10-20 years while maintaining structural integrity.

Renovation & Retrofitting

Structural repair, structural strengthening.

Old buildings deserve careful hands. We diagnose with non-destructive testing, design a retrofit that respects the original materials & execute with crew who have spent years on retrofitting work.

- Structural retrofitting
- Cantilever slab extension
- Steel Jacketing / FRP column wrapping
- Home / Villa / Apartment Remodelling or renovation
- Facade Remodelling

Turnkey Project Management

One contract. One accountable team.

When a client wants a single point of accountability, we hold the entire scope: design, statutory, procurement, construction, finishes, handover. We bring our own QS, MEP and interiors leads, and we report against a single locked schedule.

- Single-point-responsibility contracts
- In-house QS, MEP and interiors
- Statutory liaison (BBMP, BWSSB, BESCOM)
- Locked schedules with weekly variance reports

Core Specialized Services (Cont'd)

Architectural & Structural Consulting

DIVISION 03

We take a quiet, evidence-led approach to structural design. Every member is sized to a load case we can defend on a board. We work in ETABS and SAFE.

Architectural & Structural Consulting

Analysis, modelling, peer review.

We take a quiet, evidence-led approach to structural design. Every member is sized to a load case we can defend on a board. We work in ETABS and SAFE, and we put our drawings on site only after our lead engineer has reviewed them.

- Load analysis & structural modelling
- Foundation design for difficult soils
- Seismic & wind load calculation
- Independent peer review for other firms
- Architectural planning design

Our 5-Step Engineering Process

01 Consult

A site visit, an honest conversation, and a one-page brief that captures what you actually want to build.

02 Design

Architectural intent meets structural reality. We model every member, run every load case, share every assumption.

03 Estimate

A line-item BOQ priced against current market rates. No allowances, no soft numbers, no surprises later.

04 Build

A locked schedule, a single site engineer, weekly reports, and quality checks signed at every pour.

05 Handover

A documented handover pack, every test certificate, and a structural warranty that means something.

100%

Structural Warranty & Handover Quality Pack: Every project delivered comes with an official handover pack containing concrete cube test reports, steel mill certificates, as-built CAD drawings, and a formal structural warranty.

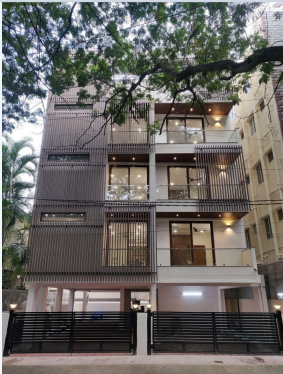

Turnkey Construction Showcase

Koramangala Apartment Building

RESIDENTIAL

COMPLETED

Koramangala 3rd Block, Bengaluru

Built Area:	8,194 sq.ft	Floors:	G+2 floors
